Have you seen the new line of Laptop minis to hit the market? With a battery time of more than 5 hours and weighing only 3 pounds this makes the perfect travel companion. Laptop mini's are fully loaded and make a wonderful back up LIFE System for your practice! We are so impressed with these new laptops we have decided to include this in your purchase as a back up to your LIFE System laptop included with your purchase! Yes.. we are including not 1 but 2 laptops with your LIFE System purchase (while stocks last)

Now when you travel with your LIFE System, travel with your LIFE mini!

BUT WAIT, There is still more

Professional Biofeedback System

ADD FREE- your choice of one of the following:

Light Pad,
a \$325.00 value

Small Torso Pad,
a \$175.00 value

Blanket Pad,
a \$250.00 value

Blue Ribbon Horse Blanket,
a \$350.00 value

Light Pad: Pad plugs into the L.I.F.E. System rear head band port. 17" x 17"

- Eight high intensity miniature LED's Red, Blue, Green, Yellow mounted on a custom circuit board that provides 4-color light feedback.
- Eight Wide 1" x 8" Highly Conductive rubber Electrodes each is wired in series to deliver total surface conductivity.
- Oil impervious rubber formulation.
- Includes a 12' cable. The L.I.F.E. pad enables full send/receive capability that delivers maximum feedback to localized areas of the body. Some people who are a little claustrophobic prefer to lie on this pad rather than wear the head harness.
- Useful for surrogate feedback on infants or small children in the mother's arms.
- Also provides biofeedback to all animals.

Small Torso Pad: Blue Polyester Fleece top contains a luxurious silver liner that is comprised of a nylon base and plated with highly conductive medical grade 99% silver coating. The silver liner maximizes delivery of the intended feedback from L.I.F.E. and as we know, silver has antimicrobial properties. Sized a 23" x 29" this is a smaller compact version of the full sized Human Blanket. It provides coverage for the Torso or smaller areas of the body. This is an excellent size for a small child and may be used for animals.

We recommend never using the same blanket on humans and animals; you would need one for humans and one for animals, to ensure no contamination regarding animal allergies. Attach to the L.I.F.E. System using our MC8 8' "Quick Release" Magnetic Clasp Connector (included). Connects to red port at rear of L.I.F.E. System. Also consider using this blanket as an EMF shield during air travel (see ground wire MC36). Blanket may be washed on cool, delicate cycle using non-corrosive and/or non-phosphate gentle soap. Color may change.

L.I.F.E. Professional Biofeedback System

Large Blanket Pad: Crawl under this Micro Fleece top with a luxurious Silver liner that is comprised of a nylon base and plated with highly conductive medical grade 99% Silver coating. The Silver liner maximizes delivery of intended feedback from L.I.F.E. and as we know, silver has Antimicrobial properties. Sized at 36" x 60" it will accommodate a large work area to include major organ coverage, all spinal meridians and more.

Attach to the L.I.F.E. System using our MC8 8' "Quick Release" Magnetic Clasp Connector (included). Connects to red port at rear of L.I.F.E. System. Also consider using our blanket as an EMF shield during air travel. Try your own warm and luxurious travel companion for yourself. The Blanket may be washed on cool, delicate cycle using non-corrosive and/or non-phosphate gentle soap. Colors subject to change.

Blue Ribbon Horse Blanket: Royal Blue High-Tech Nylon Veltex® Velcro® Fleece lined with a highly conductive medical grade Nylon that has been plated with 99% Silver. Antimicrobial Silver liner maximizes delivery of intended feedback from L.I.F.E. Sized at 27" x 37" to accommodate larger work area to include major organ coverage, all spinal meridians, and may be used as an under the saddle EMF shield.

Adjustable Polypropylene Herringbone Webbing Straps attach to Fleece with Velcro® and include an elastic section in the girth for potential heavy breathing comfort. Attach to the L.I.F.E. System using our MC15 15' "Quick Release" Magnetic Clasp Connector (included). Connects to red port at rear of L.I.F.E. System. Has plastic slide buckles so no metal touches your horse. The Blanket may be washed on cool, delicate cycle using non-corrosive and/or non-phosphate, gentle soap.
